

General Occupant Training

The General Occupant training provides an overview and awareness of workplace emergencies, building emergency systems and procedures for all of your employees. The highest priority must be to evacuate everyone from an emergency affected area in a safe and orderly fashion. Evacuation procedures and staff roles and responsibilities in the plan are vital and with training scheduled for staff every 12 months compliance with Australian Standard 3745 is achieved.

Course Duration and Location

This course is approximately 30 minutes and delivered at your premises.
