Making the world
a safer place

Chubb Monitoring Center

Like You Never Left

You cannot be everywhere all the time --- which is why we establish the Chubb Monitoring Center. Once your security system is connected to our monitoring center, real people and advanced technologies safeguard your premises around the clock. Rest assured that your loved ones and valuable assets are protected, even while you are away.

Experts On Your Side

Trained Chubb fire safety and security experts remotely monitor burglar alarms, fire alarms and CCTV systems. If an alarm is activated and a genuine threat is verified, our experts will initiate appropriate countermeasures and notify the authorities, request medical assistance, and contact appropriate key personnel on your behalf.

- Receive email or text message alerts of events or alarms on your premises.
- Trained professionals in Chubb Monitoring Centre work around the clock and use advanced technologies to deliver near real-time assessments and fast response when minutes count.
- Protect your assets on your terms with flexible, affordable contracts.
- The next generation monitoring software platform offers increased efficiency and greater integration opportunities giving you more control and visibility of data from your fire safety and security systems.

Community Care

Owned and operated by Chubb, Easilink is one of the Hong Kong's leading providers of personal emergency response service, protecting some of the most vulnerable in our society since 1995. The flexible and easy to use packages offer right features and functionality that enable customers to communicate securely, quickly, and clearly with our monitoring center, 24/7.

Fire Safety

Preventing Fire

Fire Risk

Assessment – gives you peace of mind that your people, properties, and assets are better protected, and you are fully compliant with the latest government regulations.

Fire Training – helps your people understand fire risks and how to avoid a fire.

Detecting Fire

24/7 Fire Alarm

Monitoring – monitors your building for fire around the clock, and fire emergency services are notified in case of an incident.

Fire Detection

Systems – enable early stage detection before the fire takes hold.

Containing Fire

Fire Extinguishers

– help prevent a minor fire from becoming a major one.

Fire Extinguishing

Systems – protect vital IT and electrical equipment from major damage.

Hose Reels

– trained employees can contain a fire before emergency services arrive.

Sprinkler Systems

– lessen fire impact and dangers to staff and firefighters.

Escaping Fire

Emergency Lighting

– creates a clearly marked passage in the event of power failure and reduces the risk of injury.

Voice Alarms

– send and receive clear instructions; quick response to those in danger.

Fire Safety Signs

– help guide people to the nearest safe exit.

Training

– equips your people with fire response knowledge and practice to improve their safety.

Electronic Security

Preventing an incident

Site Audits – receive expert advice to identify and overcome risks and remain compliant.

System Design – work closely with our engineers to develop a solution specific to your building requirements.

Vault Door, Safe and Lock – secure valuables with a range of models and sizes for home and business.

Visible Deterrents – make a clear statement with Chubb warning signs that your site is protected.

Detecting an incident

Intruder / Burglar

Alarms – detect security breaches and deter potential criminals with your first line of defense.

Access Control

Systems – manage building access and set permissions for authorized occupants.

CCTV Systems

– see, record, and act upon incidents with Chubb Monitoring Center integration.

Responding to an event

Intruder & CCTV Monitoring / Video Verification

– respond to intruder detection and notify the authorities, 24/7.

Remote Video Response

– go beyond security with features like remote gate operation.

Evidence Gathering

– record video footages to support legal action.

Advanced solutions

Video Analytics – use advanced algorithms to automatically detect people, vehicles, or other objects through CCTV capture and trigger a predefined response.

Building Solutions Any Time

Chubb works with your team to design fire safety and security solutions for new and existing projects during any phase of the building life cycle. Experience one-stop convenience with easy integration options for third party systems and access to a complete portfolio of fire and security products. Comprehensive service and maintenance capabilities further monitor system reliability and upgrade opportunities to meet your growing business needs.

Improve Dependability Prolong System Life

Regular maintenance service for your fire safety and security equipment is essential for system dependability when you need it most – in an emergency. Preventive inspections identify potential problems before they occur and can be supported with a rapid, prioritized response if required. Regular maintenance can reduce the risk of false alarms too, which not only saves money, but also prevents disruption to your business and protects your response levels with emergency service.

About Us

Chubb is a leading global provider of end-to-end fire safety and security solutions worldwide, making the world safer, protecting people and giving customers peace of mind. Since two enterprising brothers, Charles and Jeremiah Chubb, invented the first patented detector lock, Chubb draws on over 200 years of experience to provide high quality, and reliable fire safety and security solutions from design and installation to monitoring and ongoing maintenance.

Today, our localized service is delivered through a global network of employees in 200+ branches in 17 countries, supported by expert teams, 24/7, 365 days a year. Chubb is a part of APi Group, a global, market-leading business services provider of safety and specialty services in over 500 locations worldwide.

Founded in 1994, Access Control Systems Limited is our group company in Hong Kong that specializes in all-rounded and smart car park management solutions. It provides flexibility and efficiency in software development, payment methods, data analysis and reports with customization.
