

Fire Extinguisher Protection Boxes

Protecting your world

Extinguisher Protection Boxes

Manufactured from lightweight recyclable polyethylene, Chubb's protection boxes are strong, durable and designed to withstand the harshest elements.

Features

- Suitable for floor or wall mounting
- Single box can also be used for vehicle mounting
- Front loading
- Internal tension straps to prevent movement
- Transparent polycarbonate windows
- Left or right hinged mounting
- Fully corrosion proof
- Shatterproof construction
- Resistant to most chemicals

Alarmed Protection Box

As extinguisher protection boxes can never – and should never – be locked, it does leave the extinguisher vulnerable to being stolen or vandalised, particularly if it is sited outside. To combat this threat, Chubb have installed a Theft Stopper on the inside of this protection

box. If the box is opened, it will emit an ear-piercing alarm. Using this technology the Theft Stopper acts as a deterrent to ensure your extinguishers are there when you need them most.

Product	Suitable for	H (mm)	W (mm)	D (mm)
Single protection box	6/9 kg/litre extinguishers	713	328	266
Double protection box	6/9 kg/litre extinguishers	713	583	232
Single CO ₂ protection box	5kg CO ₂ extinguishers	825	328	266
Alarmed single protection box	6/9 kg/litre extinguishers	700	320	255
Alarmed double protection box	6/9 kg/litre extinguishers	720	585	270
Single protection box with break glass	6/9 kg/litre extinguishers	700	300	255
Double protection box with break glass	6/9 kg/litre extinguishers	720	565	270
Alarmed single protection box with break glass	6/9 kg/litre extinguishers	700	300	255
Alarmed double protection box with break glass	6/9 kg/litre extinguishers	720	565	270

Transport Brackets

Alternatively, Chubb offers a wide selection of brackets designed specially for its extinguishers.

These brackets are manufactured from hard wearing steel with a matt black finish and are suitable for affixing 3, 6 or 9 litre/kg extinguishers and 2 and 5kg CO₂ extinguishers.

Extinguisher Vehicle Protection Boxes

Chubb transport boxes are designed to give maximum protection to your extinguishers. Made from recyclable lightweight polyethylene, they are strong and durable.

Features

- Top loading
- Internal tension straps to prevent movement
- Flat back for ease of mounting
- Fully corrosion proof
- Shatterproof construction
- Resistant to most chemicals

Product	Suitable for	H (mm)	W (mm)	D (mm)
Single transport box	6kg/litre extinguishers	650	260	275
Single transport box	9kg/litre extinguishers	750	300	300

ADR (European Agreement concerning the International Carriage of Dangerous Goods by Road)

Changes to provisions concerning transport equipment:

Any vehicle carrying dangerous goods is required by the ADR to meet the following minimum provisions:

Vehicle size	Standard minimum coverage	Must include
Up to 3.5 tonne	4kg dry powder*	2kg for cab plus 2kg
Over 3.5 tonne and up to 7.5 tonne	8kg dry powder*	2kg for cab and at least one 6kg
Over 7.5 tonne	12kg dry powder*	2kg for cab and at least one 6kg
Any vehicle carrying dangerous goods under the "small load" limit or carrying only infectious substances		One 2kg only

The portable fire extinguishers shall be:

- Kitemarked (or equivalent independent approval) to EN3
- Serviced to national standards (ie BS 5306-3) to guarantee functional safety
- Clearly marked with the next service date (month, year format)
- Installed on the transport units in a way that they are easily accessible to the vehicle crew
- Installed in such a way that the fire extinguishers shall be protected against the effects of the weather so that their operational safety is not affected.

The ruling of the ADR is British law where upon it is an offence not to adhere to these minimum extinguisher requirements.
